INTRODUCTION

Assalamu'alaikum Warahmatullahi Wabarakatuh

The 1st International Conference of Health Sciences UMP is the first international conference held by The Nursing Science Department of Universitas Muhammadiyah Purwokerto (UMP). It provides a forum to exchange experience and knowledge among researchers, academicians, clinicians, and students of health sciences. As we faced a pandemic, the conference will be held virtually using the zoom platform on 19 August 2020.

The COVID-19 outbreak on all around the world has changed multiple policy systems, including the education system in Indonesia. It has to be conducted through online learning. We know that education on health sciences including nursing science, medical science, nutrition, pharmacy, public health, etc need a different type of learning method such as on class learning, learning in the laboratory, clinical learning (in a hospital or other health facilities), and learning in the community. We have to try our best to shorten the gap between our usual learning methods and the new system of online learning. Through this conference, we try to provide an update about the changes in education methods in the health sciences field during the COVID-19 outbreak, share from different countries such as Indonesia, Malaysia, Taiwan, and England.

We publish article, based on this following topics 1) Maternity and women health; 2) Medical and surgical nursing; 3) Family and community nursing; 4) Emergency and critical nursing; 5) Pediatric health; 6) Holistic Care; 7) Management and Leadership; 8) Patient Safety; 9) Diagnostic; 9) Innovation in Health Care.

Wassalamu'alaikum Warahmatullahi Wabarakatuh

Purwokerto, September 2020
General Chair
