FOREWORD

Digital literacy means having the skills we need to live, learn, and work in a society where communication and access to information is increasingly through digital technologies like internet platforms, social media, and mobile devices. Digital literacy promotes student learning by providing a solid foundation for students to engage with online resources by utilizing digital tools effectively in the learning process both in education and science.

To face the increasingly complex challenges of digital literacy in education and science issue, the Faculty of Teacher Training and Education– Universitas Muhammadiyah Purwokerto, held the 7th AECon (Asia-Pacific Education & Science Conference) activity on January 27, 2022 with the topic of Digital Literacy in Education and Science is to review our way of educating students as way of suiting our educational practice to the current and future challenges, both regional and international and to get better vision of how we should educate people and improve the quality of human resource.

Thank you.

Purwokerto, February 2022
Vice Dean I of Teacher Training and Education Faculty
